

Product description

New protection cream for wood countertops and cutting boards. This all natural formula is based on a combination of unbleached beeswax and food grade mineral oil. It penetrates deeply into the grains of the wood, leaves a silky wax barrier and locks moisture in.

Used regularly, the protection cream will help to replenish the moisture lost from repeated washings, keeping your countertop, butcher block or board from drying, bleaching and cracking.

New!

A natural formula that protects the wood, revives its color and enhances its longevity !

Advantages & Benefits

- **All natural formula** made from a combination of beeswax and food grade mineral oil, **can be applied as frequently as wanted for an optimal protection.**
